

Do you operate a business-critical application which is based on end-of-life technology? We can support you in migrating to .NET.

# Migration & Integration in a .NET Environment

## Old Becomes New

In Zühlke you will find an accomplished partner for the migration of existing applications onto a Microsoft .NET platform. In this situation the following scenarios are possible:

- Complete migration: all code is taken over and adapted
- Partial migration: some parts of the existing code are migrated, others parts included into components and integrated.
- Integration: the existing code is included in components and integrated in newly developed .NET software.

## What we offer

We support you when deciding on the technical and economic pro and cons and help you to use .NET efficiently in your projects:

- Point the way to possible migration paths
- Build up knowledge in your team
- Implementation within time and budget.

## Our Experience – Your Security

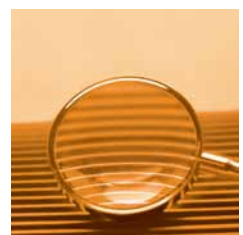

Benefit from our experience in re-engineering existing applications, migrating new technologies, and integrating applications (EAI). Zühlke's experience means increased security in reaching your goals.

## Project Examples

We have already implemented many migration and integration projects in the .NET environment. Amongst others are:

- Migration of an existing Windows application for the evaluation, presentation and archiving of environmental and noise data onto .NET.
- Connecting existing trade systems to supplier systems using .NET Services.
- EAI platform for the integration of retail information systems.

Integrate and migrate – we support you in the evaluation and conversion of the right approach. We look forward to you contacting us.
