

Zühlke is a successful technology and consulting company that offers customised software solutions for insurance carriers. We make your ideas reality and take responsibility for your projects. You too can benefit from our project experience in the insurance sector.

Consulting Development Integration

Zühlke for Insurance Carriers

Company profile

Zühlke is a leading independent technology and consultancy company focussed on providing bespoke software solutions and product innovation. Our multidisciplinary teams offer consultancy, development and integration based solutions. With 5000 projects to our credit we have learnt how to bring customer ideas to life by combining our flair for innovation with our industry experience and engineering discipline. From our offices in Bern, Frankfurt, Hannover, London, Munich and Zurich we like to stay close to our customers. As an independent company Zühlke are free to select without compromise the right technologies and suppliers to best suit our customer needs. Zühlke is medium sized financially sound business generating consultancy revenues in excess of EUR 38 Million and employing around 300 staff.

Individualised solutions for your processes

Insurance companies and health insurance funds have to be highly adaptable in order to keep pace with the constant changes in their sector and the ever-shorter innovation cycles for products. Customers and sales partners want to be able to access information and conduct business transactions over the internet. Internally, these enterprises have a great need for optimising their business processes as well as their IT systems, which have evolved organically over many years.

We are your partner for ...

- Evaluating and optimising overall IT architectures based on criteria such as security, performance and use of the latest technologies;
- Planning and carrying out IT modernisation;
- Strategy advice;
- Managing software projects utilising iterative and/or agile methods;
- Implementing software solutions and system integration tasks;
- Requirements engineering;
- Developing mobile and web-based information systems;
- Training and coaching customer teams.

Examples of completed projects

- Bayerische Versorgungskammer: Test management for insurance software, GUI testing: Tool evaluation and introduction.
- CSS Krankenkasse: J2EE reference architecture, automatic service-based billing.
- Skandia: Web application in insurance sector, UML and RUP training, modern software solution for insurance advisors.
- Suva: Replacement of business critical host applications, data migration, Java EE solution for annuity management.
- AXA Winterthur: Technical expertise for EXTRA, interim project management.
- Zürich: Information system for the management of framework agreements.

We help you to implement your projects quickly and competently. Your bespoke solution matches your processes and procedures exactly, allowing you to seize all market opportunities that arise. You too can benefit from our project experience in the insurance field. Contact us for further details.
