

Zühlke posts growth of 24%

Zurich, April 18, 2008

The Zühlke Group put in a fine performance in FY 2007. Sales rose by 24% to CHF 62 million. New development centres were opened in Bern and Munich. As a result, the company successfully expanded into new markets and now has 300 employees working in six different European cities.

Zühlke hired an additional 50 consultants, increasing its personnel by 20%, and will continue hiring highly qualified staff and investing 12% of total sales in their further training. Growth and expansion in existing and new markets will be the focus of efforts at Zühlke in 2008.

The globalisation of markets is opening up new opportunities for Zühlke's customers to sell their products, but has also led to fiercer competition. Customers are forced to evolve and change constantly in order to succeed in their chosen marketplace with innovative products and services. It is precisely in these areas that Zühlke can assist its customers with innovative and outstanding services.

About Zühlke

Zühlke is a leading technology and consultancy company providing bespoke software solutions and product innovation. Zühlke advises, develops and integrates to efficiently deliver solutions of the highest quality.

Zühlke enables its customers to successfully implement their ideas with processes, products and services that set new standards in reliability and performance. Zühlke is a multicultural business with a global outlook. With offices in Bern, Frankfurt, Hannover, London, Munich and Zurich we can stay close to our clients.
