

The Future Face of Artificial Intelligence

12 April 2018 | **Augmented & Virtual Reality** | [Wolfgang Emmerich](#)

Reading time: 1 minute

In his talk, Matthias Fuhr speaks about the future of artificial intelligence and claims that soon this technology will be an essential part of all the ordinary applications surrounding us.

His passion for data, algorithms and problem-solving motivated Matthias to pursue his pleasure professionally as a data scientist.

He is fascinated by the power of artificial intelligence and machine-learning. This talk was given at a TEDx event using the TED conference format but independently organized by a local community.
