

Copilot at Enterprise Scale

A structured approach to getting Copilot-ready and jump starting your AI transformation

Empower your organisation with the dynamic synergy of a GPT-based language model and Microsoft Graph, expertly orchestrated by your IT department, and guided by Zühlke's standardised methodology. This strategic integration ensures seamless operation and unleashes unparalleled data-driven insights, driving innovation, efficiency, and strategic decision-making throughout your operations.

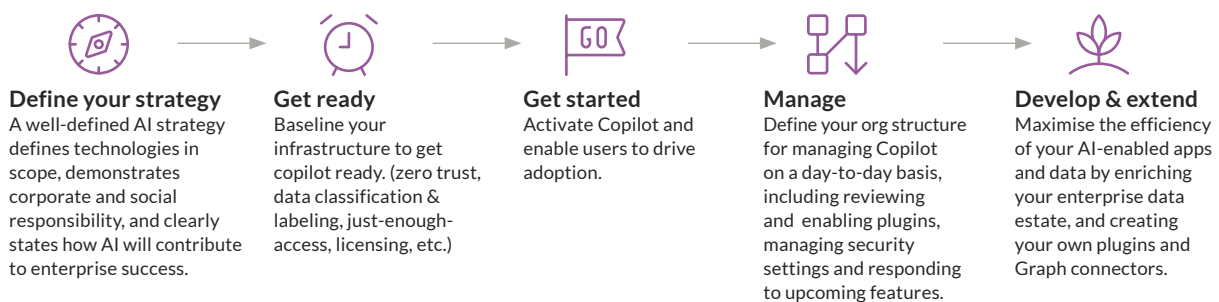

Driven by LLM, seamlessly integrated with M365, and effortlessly expandable

Based on six essential pillars

-  **Organisation**
AI requires targeted goals
-  **Use Cases**
AI thrives on impactful cases
-  **Teams & Skills**
AI teams need evolving skills
-  **Infrastructure**
Adaptable IT boosts efficiency
-  **Data**
Nurturing valuable, elusive data
-  **Governance**
Robust governance ensures compliance & trust

Five step approach to definition and implementation
