

Data Platform and Self-Service Analytics

Enable your business teams to derive valuable insights in near real-time without having to go through IT or data experts.

Unlock the power of your vast pools of valuable distributed data and propel your business to new heights by establishing a central data platform as a foundation for self-service analytics built on cutting-edge Microsoft technology. Collect raw OT and business data in near real-time. Curate information by organising and maintaining data sets so that business stakeholders are presented with relevant data in an accessible format. Say farewell to the chaos of isolated data silos and say hello to the efficiency of a unified data ecosystem!

Benefits

- Comprehensive, enterprise-wide unified data model
- Governed information access
- Harness the intuitive power of self-service analytics (based on standard tools like PowerBI)
- ✓ Scalable data platform
- ✓ Applied data governance
- ✓ Target platform architecture
- ✓ Operational readiness
